

## PT-25V Vertical Type Condensate Trap

The WIPCOOL Vertical Type condensate trap is designed to solve the problems of outdoor air reflux, odor, and harmful insect invasion in the condensate discharge pipeline of the air conditioning. The condensate trap controlled by a sensitive rebound valve, which will open by the gravity of the creating condensate water and close when there is no condensate water created. Adopting a buckle design, it is easy to install, easy to maintain, and provides users with a fresh indoor environment.

## PT-25V Vertical Type Condensate Trap

Smooth Drainage, Enjoy Fresh Air

Lightweight design, easy to install

Water storing design, prevent smelly & insect-resistant

Built-in gasket seal, ensure no leakage

Made of PC material, anti-ageing & corrosion-resistant

### Technical Data

Model	PT-25V
Inner diameter	Φ25
Outer diameter	Φ32
Negative pressure	1200Pa
Gross weight	60g
Packing	Carton:60pcs

### Exploded figure
